**Dr Nicole Muloko, researcher at the International Medical Research Centre of Franceville (CIRMF), visits ERAIFT this Saturday, April 01, 2023.**

On Saturday, 01 April 2023, ERAIFT hosted Dr Nicole Muloko, a researcher at the International Medical Research Centre of Franceville (CIRMF) in Gabon. The objective of this visit was to acquire an insight into the institutional functioning of ERAIFT and its training offers.

After fruitful exchanges with the Director of ERAIFT, Mr. Baudouin Michel, about the institutional organisation of the school, Dr. Nicole, together with the Academic and Research Secretary, Professor Jean Pierre MATE, also met with the students of the regional Masters of the fourth cohort, who are currently doing a specialisation.

Thus, she invited the learners to fully benefit from the quality training offered by ERAIFT and to always remain ambassadors of the school within their respective countries. Also, to improve their employability, Mrs. Nicole highly encouraged the learners to be proactive in the search for job offers, to reinforce their active participation in the ERAIFT networking and finally to consolidate their relationship with the political-administrative authorities from their respective countries.

ERAIFT sincerely thanks Mrs. Nicole Muloko for this visit and for the various advice given to the learners in order to improve their employability.
